

REMARKS

Claims 1 to 3 and 10 to 15 are in the case.

With this amendment, Applicant has amended Claim 1 to recite that the lower portion of the cradle has an upper ring and a lower ring, the upper ring being larger than the lower ring. This was previously recited in old Claims 8 and 9 which have now been cancelled from the application. The subject matter of old Claim 9 was indicated to be allowable and accordingly, new Claim 1 is believed to be allowable.

As aforementioned, the insertion of limitations of Claims 8 and 9 has resulted in the cancellation of these claims from the application. Claim 10 has had its dependency revised while new Claims 12 to 15 have been added to the application. These claims essentially recite the subject matter of old Claims 4 to 7 which were cancelled from the application in view of the restriction requirement. However, these claims are now believed to be allowable since they are dependent on Claim 1 which is now generic.

The prior art cited by the Examiner has been reviewed and it is believed that the claims submitted herewith clearly and patentably define over the art.

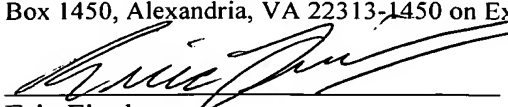

It is now believed this application is in order for allowance, and such action is respectfully solicited.

Respectfully,

Eric Fincham
Reg. 28,201
